Job Overview

Join our dynamic construction team as a Concrete Foreman/Finisher and lead the charge in delivering top-quality concrete projects! In this vital role, you will oversee the entire concrete finishing process on commercial and residential sites, ensuring precise execution from foundation to final touches. Your expertise will guide crews, manage tools and equipment, and uphold safety standards while maintaining high standards of craftsmanship. If you thrive in a fast-paced environment, possess a keen eye for detail, and

are passionate about delivering durable, flawless concrete work, this is the opportunity for you to shine! Duties

- Lead and supervise concrete finishing crews to ensure efficient workflow and adherence to project specifications.
- Read and interpret blueprints, schematics, and construction plans to execute concrete forms, rebar installation, and finishing details accurately.
- Operate and maintain power tools, hand tools, concrete mixers, pumps, heavy equipment, and other machinery essential for concrete placement and finishing.
- Oversee rebar installation, metal stud framing, masonry work, and other related tasks such as stucco, plastering, caulking, and trim carpentry to support structural integrity.
- Ensure proper use of safety protocols on-site; conduct regular safety inspections and enforce compliance with OSHA standards.
- Accountability to take your work from an idea to a full completed project with excellence in mind for yourself and your team members.
- Coordinate with project managers to estimate material needs, order supplies like concrete forms or flooring materials, and manage schedules effectively.
- Perform quality control checks during all phases of concrete pouring and finishing; address issues promptly to maintain high standards. Experience
- Proven experience in construction site roles with a focus on concrete finishing or related trades such as masonry or carpentry.
- Strong knowledge of mechanical systems including concrete mixers, pumps, power tools, heavy equipment operation, and schematics reading.
- Skilled in rebar installation, concrete forming techniques, flooring installation, tile laying, roofing basics, restoration work, and heavy lifting.
- Familiarity with blueprint reading and schematics to interpret project plans accurately.
- Ability to operate a vehicle to manage team to job site if necessary.
- Demonstrated ability to lead teams effectively while maintaining safety standards and quality workmanship. Join us in building lasting structures with precision craftsmanship! We value energetic professionals who are eager to contribute their skills in a collaborative environment dedicated to excellence in construction.
- Ability and desire to maintain good working relationships with team members, clients, vendors, etc.
